SUMMARY

Results-driven Junior Computer Engineering student specializing in Computer Networks Engineering. Demonstrated exceptional learning agility by earning 11 Cisco Netacademy course completion certifications. Active contributor to the developer community with a portfolio of open-source projects hosted on GitHub.

WORK EXPERIENCE

IT Intern, State Properties Corporation

July 2025 - August 2025

- Engineered intuitive, responsive web components and interactive user interfaces using ASP.NET MVC 5, Bootstrap 4.6, C#, and JQuery focusing on enhancing the end-user experience and data visualization.
 - Optimized and designed complex SQL Server database schemas, improving query performance and maintaining data integrity across enterprise-level platforms.
 - Managed the full project lifecycle through a centralized Git repository, streamlining team collaboration through structured branching, merging, and detailed code reviews.
-

PROJECTS

Website Portfolio

- Engineered a high-performance 3D web application using Three.js and JavaScript to serve as a centralized repository for all technical projects. Demonstrated expertise in frontend architecture and systems design by integrating interactive 3D elements with a comprehensive professional showcase.

AetherWeather Terminal

- Developed an interactive 3D weather dashboard that translates real-time meteorological data into an immersive visual environment using OpenWeatherMap API. Built a reactive user interface featuring a unique atmospheric blur effect that simulates low-visibility conditions, alongside a synchronized day-night cycle based on local city timezones.
-

EDUCATION

Bachelor of Science in Computer Engineering

Sep 2023 - Present

Polytechnic University of the Philippines - Sta. Mesa

- Core Specialization: Computer Networks Engineering.
 - Proficient in designing scalable infrastructures, implementing complex routing protocols, and developing resilient network topologies.
 - Experienced in utilizing Python for technical automation, scripting, and algorithmic problem-solving.
-

ADDITIONAL INFORMATION

- Technical Tools:** Active Directory, Adobe Creative Cloud, Arduino IDE, AutoCAD, Cisco Packet Tracer, Domain Controller, Flowgorithm, Git/Github, HashCalc, Intel Quartus Prime, Microsoft Office, Oracle VM VirtualBox, SQL (MySQL and Microsoft SQL Server), Visual Studio (Microsoft and VS Code), Wireshark.
